C 1700 MAIL ROOM

a¹

1. (Amended) A coating composition, comprising:
a silane having at least one functional group selected from the group consisting of an isocyanate, an isothiocyanate, an ester, an anhydride, an acyl halide, an alkyl halide, an epoxide and an aziridine; and
a biopolymer capable of forming a covalent bond with said silane [, wherein said biopolymer is covalently linked to the silane].

a²

4. (Amended) The coating composition of claim 1, wherein [the] said silane comprises an isocyanate [functionality].
